Introduction

EquipNet Worldwide Logistics service provides customized crating, skidding, and/or freight services for a wide array of industrial, manufacturing, and lab equipment. EquipNet Logistics can protect expensive equipment, reduce shipping costs, and allow your company to focus on its core competencies without getting distracted by the complex minutia of logistics management.

Clients can select from a menu of a-la-carte services to safely prepare and/or ship their equipment from one location to another.

Who We Are

EquipNet is a global leader of surplus asset management solutions. We're recognized for our proprietary asset management platform, our revolutionary industrial equipment marketplace, and our results-driven project management services. Our diverse roster of clients include Fortune 500 multi-national corporations, leading regional manufacturers, financial institutions, and corporate renewal professionals.

EquipNet solutions deliver maximized financial return while improving our client's corporate image, adhering to their safety standards, and contributing to their sustainability initiatives.

To facilitate the logistics process, EquipNet can:

- Obtain competitive freight quotes from a variety of national and international carriers
- Custom design and build any size wood crate or skid to safely transport your equipment
- Provide foam packing to protect fragile equipment
- Perform crating, skidding, and shipping services at your location
- Schedule delivery
- Manage customs for international shipping needs
- Provide tax documentation
- Provide delivery notification calls and emails
- Track shipping and provide proof of pick-up and/or delivery
- Purchase shipping insurance
- Remove old packaging

Why Choose EquipNet?

Protect expensive equipment

EquipNet crates are custom-made for each individual piece of equipment with special packaging and handling available for fragile items.

Reduce shipping costs

Professional, customized crating reduces the cost of shipping. When items are appropriately protected, they do not have to travel on an unprotected skid and the shipper usually charges less. EquipNet also gets preferential shipping rates which we pass on to our clients.

Meet all your shipping needs

Rather than have one contractor packaging your equipment and another shipping company deliver your equipment, EquipNet is able to handle both.

Why Choose EquipNet?

Trust the experts

EquipNet provides the highest quality custom-built crating and packing service in the market and only engages outsourced partners who can meet the EquipNet standards. EquipNet partners with the best-of-the-best crating and packing specialists around the world. These partners are able to custom build crates and tailor the shipment to your individual product specs and budget, as well as ship from your local area.

Focus on your core competencies

By utilizing EquipNet Logistics, customers can focus on core business needs without being distracted by the burdens associated with crating and shipping needs.

EquipNet Worldwide Logistics provides the highest quality custom-built crating and packing service in the market, and we only engage logistics partners who can meet your high standards. Because of our close relationship with our shipping partners, we receive preferential rates, which we can pass on to you in the form of significant savings.
