

APPRAISAL AND VALUATION SERVICES

Case Study

THE CLIENT

A major pharmaceutical corporation based in Europe with facilities around the globe.

CHALLENGE

The client was preparing to put one of their production facilities in Morocco up for sale. They needed to isolate the value of the machinery and equipment within the facility from the value of the overall facilities and real estate. The major hurdle was finding a vendor with enough knowledge of the pharmaceutical industry to understand what the presence of penicillin meant in regard to the value of their assets in the facility. Since the majority of staff at the site were preparing for the facility's sale, the client needed a vendor to provide a turnkey service that would not divert their employees' focus away from their current responsibilities.

SOLUTION

EquipNet Appraisal and Valuation Services.

THE RESULT

EquipNet tackled this project head-on, providing a detailed desktop evaluation service that did not cause a disturbance to the site's operations and did not require any of their employees to drop what they were doing and provide assistance. By issuing EquipNet an inventory report with all of the necessary information about the assets at their Moroccan facility, EquipNet was able to provide a detailed and professional report with accurate market values, keeping the penicillin contamination in mind. Problem solved.
